

NINA NIKOLIĆ

FULL STACK DEVELOPER

Profile

I am a highly motivated and detail-oriented individual with a strong work ethic and a continuous desire for professional growth. I currently work at Elektrodot as a programmer, where I am involved in the development of various PHP projects, including systems that process and handle XML data.

In addition to backend development, I actively work on creating WordPress websites, both standard and fully custom solutions, tailored to client needs. I also contribute to UI/UX and graphic design tasks when required, having designed several logos for companies as well as personal projects.

Furthermore, I am partially involved in server-related tasks, including basic server management and providing technical support. This diverse experience has strengthened my problem-solving skills and adaptability, allowing me to work efficiently across multiple areas of development and IT support.

I am committed to continuous improvement and eager to further expand my technical knowledge while contributing value through high-quality and reliable solutions.

Work Experience

○ April 2025- Present
Elektrodot

FULL STACK DEVELOPER

Developed and maintained PHP-based web applications, including work on WordPress and custom solutions, with experience in XML data handling and processing. Gained some experience working with Angular on front-end development, as well as managing hosting environments via cPanel and performing basic administration on Windows Server 2022.
